## PROJECT

---

### Online Course Website using Django

This website is similar to udemy where students can buy courses for learning and give rating to enroll courses. Users who want to add courses for students can apply and add courses and videos.

**WEBSITE :-** <https://harshaaher.pythonanywhere.com/>

### Ecommerce Website using Django

This website has all the basic features that an ecommerce website has. This website is not completed yet. Users can search, view product details and give ratings to products. They can order products and pay online from this website.

### RFID Based Indoor Navigation System for Blind People

Navigation system created using RFID tags which helps blind people for indoor navigation. It helps blind people to reach a particular room or any area of the building.
